

## What type of WETT-certified professional do I need?

WETT primarily certifies individuals in the following categories (and combinations thereof):

**SITE® Basic Inspector** — These are individuals who can perform a Visual inspection.

**Technician** — These are individuals who can install or perform maintenance on wood-burning appliances. They can also perform a Visual or Technical inspection.

**Chimney Sweep** — These are individuals who can clean and maintain your entire wood-burning system, including sweeping the chimney. They can also perform a Visual or Technical inspection.

**SITE® Comprehensive Inspector** — These are individuals who can perform a Visual, Technical or Invasive inspection. These individuals are also technicians and/or sweeps.

## How can I verify that someone is certified?

You can verify that someone is certified by checking the WETT Inc. website [www.wettinc.ca](http://www.wettinc.ca) or by calling the WETT National office at 1-888-358-9388.

It is important to note that WETT certifies individuals, not companies. Companies may advertise that they have WETT-certified people on staff.

When contacting companies, you should make it clear that you are looking for a WETT-certified individual to complete work on your behalf. WETT professionals are issued photo ID cards, which include a sticker. This sticker must be for the current year.

*Add your company information, logo and contact details here.*

## I Need My Wood-burning System Inspected

Inspections of solid-fuel-burning systems (fireplaces, chimneys, wood-burning stoves, central-heating systems) are conducted for a variety of reasons. Typically, they are conducted for insurance purposes, for real estate transactions or to investigate a concern with the way the system is functioning.

## Can I get a WETT inspection or a WETT certificate?

A WETT inspection is the inspection of a solid-fuel-burning system, performed by a WETT-certified professional, for compliance with applicable codes and standards. Appliances or installations *cannot* be WETT certified.

WETT frequently receives requests for a “WETT certificate,” a “WETT certification,” a “WETT approval” or asked if it’s a “WETT-certified installation.” We also receive requests for companies that are “WETT certified.” These are common misconceptions — they do not exist. What should be issued is an inspection report completed by someone who is WETT certified. The WETT certification number of the member should be included on his or her report.

Contact a WETT-certified professional to inspect your solid-fuel-burning system. WETT has adopted a process to help identify the level of inspection required. We call this SITE®.
